RE: Formal Appeal of Claim Denial — Lonnie Von (MRN MUSC3090378), Claim MUSC-E622-2

Patient	Lonnie Von (DOB 1950-08-03)
MRN	MUSC3090378
Member ID / Group	MOL918865725 / GRP-17484
Claim number	MUSC-E622-2
Date of service	2026-04-22
Procedure billed	CPT 99214 — Office/outpatient visit, established patient, moderate complexity
Primary diagnosis	S72.001A — Fracture of unspecified part of neck of femur, initial encounter
Denied amount	\$528.15
Denial code	CARC 96 / RARC N130 — Non-covered charge(s).
Appeal deadline	2026-09-11

Dear Appeals Review Committee:

SUMMARY OF APPEAL

MUSC Health respectfully submits this first-level provider appeal on behalf of patient Lonnie Von (Member ID: MOL918865725, MRN: MUSC3090378, Date of Birth: August 3, 1950) regarding the denial of Claim MUSC-E622-2 for services rendered on April 22, 2026, at MUSC Health Ashley River Tower. Molina Healthcare of South Carolina denied the claim in full, citing CARC 96 ("Non-covered charge(s)") and RARC N130 ("Consult plan benefit documents/guidelines for information about restrictions for this service"), with the payer remark stating: "Service is excluded under the member's plan benefit document." The billed amount of \$528.15 for one unit of CPT 99214 remains unpaid. MUSC Health contends that this denial is not supported by the clinical facts of the encounter and respectfully requests that Molina Healthcare reverse the denial and remit payment at the allowed amount of \$395.08.

CLINICAL BACKGROUND

Mr. Von is a 76-year-old male enrolled in the Molina Healthcare of South Carolina Choice Plus plan (Group GRP-17484) with a coverage period extending through December 31, 2026. He carries an active diagnosis of pathological fracture due to osteoporosis, coded as S72.001A (fracture of unspecified part of neck of femur, initial encounter), with onset documented as February 12, 2021. His medical history is significant for osteoporosis, history of cardiac arrest, and a prior fracture of the forearm. He is currently maintained on alendronic acid 10 mg for osteoporosis management, as well as acetaminophen/hydrocodone and naproxen sodium for pain, all of which were ordered in connection with his fracture-related care. The April 22, 2026, encounter was performed by Amara J. Boone, NP (NPI 1203948576) in an on-campus outpatient hospital setting (Place of Service 22) and was billed under revenue code 0510. The visit was coded at the 99214 level, reflecting an established patient office visit of moderate complexity, which is consistent with the ongoing management of an active pathological fracture in an elderly patient with multiple comorbidities.

BASIS FOR APPEAL

The denial of CPT 99214 as a "non-covered" service is inconsistent with the scope of benefits that South Carolina Medicaid managed care organizations are required to provide to enrolled beneficiaries. Outpatient evaluation and management services for established patients are a standard, covered benefit under Medicaid managed care contracts, and MUSC Health is not aware of any plan exclusion that would categorically remove medically necessary outpatient E/M visits from coverage. Molina's citation of RARC N130 directs the provider to consult plan benefit documents, yet no specific exclusion language has been communicated to support this denial. The service was rendered by a licensed nurse practitioner operating within an enrolled, credentialed facility, and the diagnosis of an active pathological femoral neck fracture in a 76-year-old patient on ongoing pharmacologic therapy clearly establishes medical necessity for continued outpatient follow-up. The level of service billed, 99214, is appropriate given the complexity of managing an active fracture with osteoporosis, a history of cardiac arrest, and a multi-drug medication regimen requiring monitoring. No coding error, duplicate claim, or eligibility issue has been cited by the payer as a basis for denial.

REQUESTED ACTION

MUSC Health respectfully requests that Molina Healthcare of South Carolina conduct a full review of this appeal, reverse the denial of Claim MUSC-E622-2, and issue payment at the previously determined allowed amount of \$395.08 for CPT 99214 rendered on April 22, 2026. Should Molina require additional clinical documentation, operative notes, or provider attestation to support this appeal, MUSC Health will promptly supply any requested materials. We ask that this matter be resolved within the timeframes required under applicable state Medicaid managed care appeal regulations.

Respectfully submitted,

Angela R. Whitfield, RN, BSN, CPC
Senior Appeals Specialist, Revenue Cycle Management
