RE: Formal Appeal of Claim Denial — Sherman McGlynn (MRN MUSC0150698), Claim MUSC-20260317-FFB8-1

Patient	Sherman McGlynn (DOB 1936-10-06)
MRN	MUSC0150698
Member ID / Group	MED899232968 / GRP-44493
Claim number	MUSC-20260317-FFB8-1
Date of service	2026-03-17
Procedure billed	CPT 99223 — Initial hospital care, high complexity
Primary diagnosis	C80.1 — Malignant (primary) neoplasm, unspecified
Denied amount	\$2,291.94
Denial code	CARC 27 / RARC N30 — Expenses incurred after coverage terminated.
Appeal deadline	2026-08-11

Dear Appeals Review Committee:

SUMMARY OF APPEAL

MUSC Health East Cooper Medical Center is submitting this first-level redetermination request to Palmetto GBA, the Medicare Administrative Contractor for Jurisdiction M, regarding the denial of Claim MUSC-20260317-FFB8-1 for services rendered to patient Sherman McGlynn (MRN: MUSC0150698, Member ID: MED899232968) on March 17, 2026. The claim was submitted on April 3, 2026, and denied on April 13, 2026, under CARC 27 ("Expenses incurred after coverage terminated") and RARC N30 ("Patient ineligible for this service"), with the payer remark stating: "Member was not eligible for benefits on the date of service billed." This appeal is filed within the 120-day redetermination window, ahead of the August 11, 2026 deadline. MUSC Health respectfully asserts that Mr. McGlynn maintained active Medicare coverage on the date of service and that the denial reflects an administrative eligibility discrepancy rather than a true lapse in coverage.

CLINICAL BACKGROUND

Sherman McGlynn is an 89-year-old male with a complex oncologic history, including a documented diagnosis of primary small cell malignant neoplasm of the lung, TNM Stage 1, with onset recorded as August 2009, and carcinoma in situ of the prostate with onset in January 2003. His active problem list further includes atrial fibrillation, obesity, and localized osteoarthritis of the hand. Between 2011 and 2012, Mr. McGlynn received multiple courses of combined chemotherapy and radiation therapy, including agents Cisplatin and Etoposide, reflecting the serious and ongoing nature of his oncologic conditions. On March 17, 2026, Dr. Robert K. Lindqvist, MD (NPI 1314059687) provided initial inpatient hospital care of high complexity (CPT 99223) at MUSC Health East Cooper Medical Center, Place of Service 21, with a primary diagnosis of malignant neoplasm, unspecified (ICD-10 C80.1). The billed amount was \$2,291.94. Given Mr. McGlynn's extensive and active oncologic history, the medical necessity of a high-complexity inpatient evaluation is well supported by the clinical record.

BASIS FOR APPEAL

The denial under CARC 27 and RARC N30 rests solely on an eligibility determination — specifically, that Mr. McGlynn's coverage had terminated prior to the March 17, 2026 date of service. However, the coverage record on file with MUSC Health reflects an active Medicare plan period running from January 1, 2024 through December 31, 2026, which encompasses the date of service without interruption. There is no clinical, coding, or authorization basis cited in the denial; the sole stated reason is an eligibility discrepancy. MUSC Health has attached supporting eligibility documentation demonstrating active coverage on the date of service. We respectfully request that Palmetto GBA reconcile its internal eligibility records with the Centers for Medicare and Medicaid Services (CMS) enrollment data, as the denial appears to result from a data mismatch rather than an actual termination of benefits. Under Medicare's redetermination process, the contractor is obligated to conduct a thorough review of all submitted evidence, including eligibility documentation, before affirming a denial. The claim was correctly coded, timely submitted, and supported by a clinically appropriate encounter for a beneficiary with active, serious diagnoses.

REQUESTED ACTION

MUSC Health respectfully requests that Palmetto GBA conduct a full redetermination of Claim MUSC-20260317-FFB8-1, verify Mr. McGlynn's Medicare enrollment status against CMS records for the date of service of March 17, 2026, and reverse the denial in its entirety. Upon confirmation of active eligibility, we request that payment be issued at the applicable Medicare allowable rate for CPT 99223 rendered in an inpatient hospital setting. Should additional documentation be required to resolve the eligibility question, MUSC Health is prepared to provide it promptly through the Palmetto GBA eServices portal.

Respectfully submitted,

Angela R. Whitfield, RN, BSN, CPC
