RE: Formal Appeal of Claim Denial — Tom Goodwin (MRN MUSC6218426), Claim MUSC-DA2C-2

Patient	Tom Goodwin (DOB 1968-04-30)
MRN	MUSC6218426
Member ID / Group	MED793863465 / GRP-82676
Claim number	MUSC-DA2C-2
Date of service	2026-06-04
Procedure billed	CPT 99214 — Office/outpatient visit, established patient, moderate complexity
Primary diagnosis	E78.5 — Hyperlipidemia, unspecified
Denied amount	\$538.94
Denial code	CARC 16 / RARC N290 — Claim/service lacks information or has submission/billing error(s).
Appeal deadline	2026-11-03

Dear Appeals Review Committee:

SUMMARY OF APPEAL

MUSC Health is submitting this first-level redetermination request to Palmetto GBA (Jurisdiction M MAC) on behalf of patient Tom Goodwin (MRN: MUSC6218426, Member ID: MED793863465) regarding claim MUSC-DA2C-2, date of service June 4, 2026. The claim was denied in full on July 6, 2026, with CARC 16 and RARC N290, citing a missing or invalid rendering provider primary identifier. MUSC Health respectfully asserts that this denial reflects a correctable administrative deficiency and that the underlying claim is valid and payable upon reprocessing with the complete provider identifier information.

CLINICAL BACKGROUND

Mr. Goodwin is a 58-year-old male established patient with active diagnoses of hyperlipidemia (E78.5) and obesity (E66.9), among other documented conditions including prediabetes and anemia. He presented on June 4, 2026, at MUSC Health Ashley River Tower, an on-campus outpatient hospital facility (place of service 22), for an outpatient evaluation and management visit. The encounter was rendered by Amara J. Boone, NP (NPI 1203948576) and billed under CPT code 99214, representing an established patient office or outpatient visit of moderate medical decision-making complexity. The claim was submitted on June 11, 2026, with a total billed charge of \$538.94.

BASIS FOR APPEAL

The payer's stated denial reason is: "Claim cannot be adjudicated; required data element(s) are missing or invalid," corresponding to CARC 16 (Claim/service lacks information or has submission/billing error(s)) and RARC N290 (Missing/incomplete/invalid rendering provider primary identifier). MUSC Health acknowledges that a rendering provider identifier discrepancy triggered the denial and submits herewith the correct and complete National Provider Identifier for the rendering clinician: Amara J. Boone, NP, NPI 1203948576. This NPI is active and enrolled with Medicare. The denial does not reflect any question of medical necessity, coding accuracy, or coverage eligibility, and the underlying service is otherwise fully compliant with Medicare billing requirements for an established outpatient evaluation and management visit.

CPT 99214 is appropriately supported by the documented diagnoses of hyperlipidemia and obesity, both active conditions requiring ongoing management, and is consistent with the moderate complexity level indicated by the management of two or more chronic conditions. The claim was submitted within the timely filing period, the patient's Medicare coverage was active on the date of service (coverage period January 1, 2024 through December 31, 2026), and this redetermination request is being filed within the 120-day appeal window, ahead of the November 3, 2026 deadline.

REQUESTED ACTION

MUSC Health respectfully requests that Palmetto GBA reprocess claim MUSC-DA2C-2 with the rendering provider NPI 1203948576 recognized as complete and valid, reverse the denial issued on July 6, 2026, and issue payment at the applicable Medicare allowed amount. Should additional documentation be required to complete adjudication, MUSC Health is prepared to respond promptly. We ask that this redetermination be completed within the timeframe required under Medicare's appeal regulations and that written notice of the determination be provided accordingly.

Respectfully submitted,

Angela R. Whitfield, RN, BSN, CPC
